Summary

I am a Front-End Developer with experience in building websites related to the stock market, meeting room booking systems, and travel recommendation platforms using React.js. I specialize in UX/UI design to deliver modern and user-friendly experiences, including the development of Parallax Effects for visually engaging interactions. My expertise includes code refactoring, debugging, API integration (REST & GraphQL), and performance optimization to ensure systems run at their highest efficiency. I am also highly driven to continuously learn new technologies in order to enhance my skills and stay ahead in the ever-evolving tech landscape.
